

ADEESSE TEACHING DAY

Saturday, September 22, 2018

in Corsica

Final program

Hôtel Radisson Blu, Ajaccio bay, Porticcio

Honorary President: Pr Brigitte Dréno

Dear friends,

On the threshold of its eleventh year, the ADEESSE takes a new turn by relocating its next congress to Porticcio, in the bay of Ajaccio, on September 22, 2018.

As every year, we will explore a topic in-between medicine and aesthetic. After pigmentation's disorders in 2017, what better choice than acne and "acneiform" eruptions? We all know the disfiguring aspects and the sometime dramatic scarring this disease leads to. We aim to offer you relevant guidelines for optimal patient medical and aesthetic treatments with a review of the current standard of care. We have the honour of the participation of professor Brigitte Dréno, one of the world experts in Acne.

Of course, everything you need to know about Lasers and Energy Based Devices, Peelings and Fillers, Botulinum Toxin will be covered to help you update your daily practice. Among the many topics explored are cheek flares, simple and effective peels, combined treatments in the management of aging ...

Our surgical experts will show us easily reproducible techniques in surgery such as subcision for scars.

Finally, sensitive current topics, such as the role of diet in autoimmune and auto-inflammatory dermatosis, teledermatology, or vulvar pathologies will be addressed.

We hope that many of you will join us and participate in this studios and enjoyable day which will end with an unforgettable gala diner & evening in the exceptional setting of the bay of Ajaccio (Corsica...).

*Dermatologically and "Adeessement" yours
Christine Noé*

Note that the French is the official language of the congress
